50 Liter Auto Sensor Waste Bin

Complement any room with this inlegant infra red sensor opening & closing waste bin

The auto sensor waste bin is a hands-free wireless waste bin, and uses infrared technology to open and close the waste bin automatically. This helps prevent contamination and helps create a germ free environment wherever you use it.

This innovative waste bin will improve hygiene, no more having to touch the waste bin to open and close it - especially when preparing food in the kitchen.

The new auto sensor waste bin, with its auto opening sensor function, eliminates the need for human contact, it provides a hygienic solution for any room.

Auto sensor waste bin use a mini Movement Sensor, which senses movement from an infra-red sensor positioned in front of the waste bin lid, to detect when to open the lid.

When movement is detected approximately 15cm away from the top of the auto sensor waste bin, the lid will automatically open. The waste bin will also close automatically once you move away from it.

Key Benefits

Opens and closes automatically using infra red technology

Leaves both hands free

Keeps clean and hygienic longer

Eliminates washing hands after use

Quick and simple bag change

High quality stainless steel design
