Safety and financial benefits.

Wet floors are one of the major causes of slips and fall accidents.
Slipping is the main cause of injuries in the work place.
Many people every year suffer a serious injury as a result of slipping.
Society has become more claim conscious.
Compensation claims result in substantial payouts.

Slips, trips and falls are the most common cause of non-fatal major injuries
In the service industries and account for over half of all reported injuries to members of the public.

Model ST100A

Model ST200A

Design registration for Umbrella machine
ADP NUMBER: 00074615001

Customer requirements

The **ST100A** Umbrella machine is a single unit made with steel casing, takes 500 bags per load.
ST200A is the double unit in steel which can be used for long and short Umbrellas, takes 1000 bags per load.
We also have Stainless steel casing, **ST100B** for the single and **ST200B** for the double unit.

All machines will be individually bar-coded with their own serial and model numbers, and would come with wall and machine stickers for operations and how to load the Umbrella bags into the machine.

Long Umbrella bags **STlong** are sold per 2000pcs and also Short bags **STshort** in 2000pcs, and split into 4 packs of 500 pcs.

Bio degradable bags can be ordered for customers requirements, please contact us to request prices.

Umbrella bags can be printed with customer's company details and adverts can be placed on the sides of the machine to give great advertising.
